Characteristic curve

Mode 2

- ① Black background, 6% remission factor
- ② White background, 90% remission factor

Mode 1 and 6 combined

Minimum distance in mm (y) between the set sensing range and white background (90 % remission factor)

Example: Safe suppression of the background

Black object (6 % remission factor) Set sensing range x = 300 mm Needed minimum distance to white background y = 17 mm

- Recommended sensing range for the best performance
- ① Ultra-black object, 1% remission factor
- ② Black object, 6% remission factor
- ③ Gray object, 18% remission factor
- 4 White object, 90% remission factor

Mode 1, 3, 4, 5

Minimum distance in mm (y) between the set sensing range and white background (90 % remission factor)

Example:

Safe suppression of the background

Black object (6 % remission factor) Set sensing range x = 150 mm Needed minimum distance to white background y = 5.5 mm

- Black object, 6% remission factor
- ② Gray object, 18% remission factor
- 3 White object, 90% remission factor

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
